

### **Aurora Borealis**

Note 1: These two photographs are part of a far larger series of photos that were filmed in a rapid sequence as the Aurora Borealis lights played across the sky.

Note 2: The subtle changes in brilliant colours of the sunrise, as well as in shifts in the intensity of lights, are exquisite demonstrations of the wonders of the natural world.

Time: Early winter morning, very early in 2015

Place: Northern Canada

Photographer: Nilima Sonpal-Valias
