Evidence Based Librarianship and Information Practice in UK Health Libraries

An opportunity to hear about EBLIP in action! This study day will provide examples of EBLIP in practice, and give you some ideas as to how EBLIP can be used to improve your library and information service.

For those of you who couldn't make it out to Australia in 2005, this study day is an opportunity to hear 6 of the British speakers who presented at the Evidence Based Librarianship conference in Brisbane last year. Presentation topics range from providing information for patient care to the issues and problems experienced by librarians' conducting research, as well as exploring why mental health staff don't use library services.

In the afternoon you'll be able to choose between one of the following workshops:

- How to conduct and interpret evaluations of information skills training

- How to conduct and interpret user surveys/information needs analyses
- How to conduct and interpret evaluations of library and information services

Date: Monday 20th November 2006

Venue: Central London, UK.

Cost:

HLG Member: £65.00 + VAT (£11.38) = £76.38

Non-member: = £80.00 + VAT (£14.00) = £94.00

To book a place, or for further details and a full programme, please contact Marishona Ortega: mortega@lincoln.ac.uk or (01522) 837350
