Call for Applications: Evidence Summaries Writers for *Evidence Based Library and Information Practice*

© 2018. This is an Open Access article distributed under the terms of the Creative Commons-Attribution-Noncommercial-Share Alike License 4.0 International (<http://creativecommons.org/licenses/by-nc-sa/4.0/>), which permits unrestricted use, distribution, and reproduction in any medium, provided the original work is properly attributed, not used for commercial purposes, and, if transformed, the resulting work is redistributed under the same or similar license to this one.

EBLIP seeks to add five writers to the Evidence Summaries Team. Evidence summaries are critical appraisal syntheses, which provide analysis regarding the validity and reliability of the methodology used in an original research article. As such, they are a key component of *EBLIP* to aid readers in making informed decisions in their local practice. Evidence Summaries Team members are required to write two evidence summaries per year, with a two year commitment to the journal. Evidence Summaries cover all areas of library and information studies and we encourage applications from information professionals in areas such as school, public, and special libraries, as well as academic settings.

Interested persons should send a cover letter, indicating areas of strength they would bring to the role, and resume/cv as a single PDF file to Heather Pretty (Associate Editor, Evidence Summaries) hjpretty@mun.ca by January 15, 2019. Applicants who are shortlisted will be asked to submit a sample evidence summary.

**Please note that *Evidence Based Library and Information Practice* is a non-profit, open access journal and all positions are voluntary and unpaid. The positions are an excellent

opportunity for continuing professional development and gaining experience in reviewing or critically appraising library-related research.

**Only those applicants who are selected or shortlisted will be contacted by the Editors.

About the journal:

Published quarterly, and hosted by the University of Alberta, this peer-reviewed, open access journal is targeted at all library and information professionals interested in an evidence based model of practice. By facilitating access to librarianship research via original research articles and evidence summaries of relevant research from the library literature, *Evidence Based Library and Information Practice* will enable librarians to practice their profession in an evidence based manner.

Please visit the Evidence Based Library and Information Practice web site (<http://journals.library.ualberta.ca/index.php/EBLIP>) for further information about the journal.
