Many *EBLIP* readers benefit from accessing this peer reviewed journal at no cost. As an open access journal, *EBLIP* brings the latest research and commentary free to librarians and other information professionals throughout the world. On March 11-12, 2010, in Albuquerque, New Mexico, the Evidence-Based Scholarly Communication Conference will highlight strategies for promoting open access publishing as a method for the quick dissemination of key research findings into practice, otherwise known as “translational” research. Full details can be found at the conference website at <
<http://hsc.unm.edu/library/EBSCConference/index.shtml>>.

EBLIP readers will be most interested in the focus on evidence-based methods for promoting open access journals such as *EBLIP* that bring the latest research findings to those who need this information. The conference will feature noteworthy evidence-based research reports in either contributed paper or poster format. The best research will be featured in a future issue of *EBLIP*. Details revolving around the October 1, 2009 deadline for research submissions can be found at the conference website. Finally, conference participants can enjoy a 73% probability of sunshine with daily temperature highs of 61°F (16°C) with world-class skiing and unique shopping opportunities available nearby either before or after the conference.
